## IN THE CLAIMS

## Amendments To The Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

- 1. (Previously Presented) A driver module structure comprising:
  - a flexible circuit board provided with a wiring pattern;
  - a semiconductor device mounted on the flexible circuit board; and
- an electrically conductive heat-radiating member joined to the semiconductor device.

wherein the wiring pattern comprises a ground wiring pattern,

the flexible circuit board has a cavity that exposes a portion of the ground wiring pattern,

the exposed portion of the ground wiring pattern and the heat-radiating member are connected to establish electrical continuity via a member that is fitted into the cavity, and

the cavity is a through hole penetrating the ground wiring pattern, a portion of the ground wiring pattern on an opposite side from the heat-radiating member is exposed, and the member fitted into the cavity is an electrically conductive screw that fastens the flexible circuit board and the heat-radiating member and provides electrical continuity between the exposed portion of the ground wiring pattern and the heat-radiating member.

## 2-7. (Cancelled)

8. (Previously Presented) The driver module structure according to claim 1, wherein the exposed portion of the ground wiring pattern and the screw are connected via an electrically conductive bonding material.
